The Rescuë Emergency Care course covers emergency first aid for outdoor enthusiasts and is the standard required for professional certification in many instruction courses. The emphasis is on practical care and evacuation of injured parties.

The Mountain Skills course cover navigation topics such as compass work, map reading, feature recognition, and night navigation. A trip report on the course is available at:

A surplus remains in the account at the end of the year. The Training and Development Officer, in conjunction with the rest of the committee, is coordinating training in 2004/2005.

UCD Mountaineering Club would like to acknowledge the O'Keeffe family's continued participation in the club and their generous support for the provision of professional training to club members.
